PROFILE

Motivated FullStack developer with experience in building efficient web applications using Node.js, React.js, NestJS, PostgreSQL, and Prisma. Passionate about algorithms and solving complex problems. Quick to learn new technologies and able to work effectively both independently and as part of a team.

EDUCATION

2021 - 2025

**FERGANA STATE TECHNICAL
UNIVERSITY**

- Software Engineering

2024 - 2025

NAJOTTA'LIM

- FullStack developer

WORK EXPERIENCE

2025, May - PRESENT

UpWork

BackEnd Developer

- Develop efficient and secure backend systems using Node.js, NestJS, and PostgreSQL.
- Design and optimize database schemas using Prisma ORM.
- Build and integrate RESTful API with front-end applications.
- Write tests and quickly fix bugs to improve code quality.
- Implement new features and optimize existing ones according to client requirements.

Projects

- Kinomania Backend – Scalable backend system for a YouTube-like video streaming platform, developed with NestJS, PostgreSQL, and Prisma ORM.
- Engineered a secure authentication flow with SMS notifications via Eskiz and email verification for enhanced account security.
- Implemented high-performance video streaming using optimized chunked transfer for seamless playback.
- Designed and integrated modules for video management, comments, likes, and subscriptions, ensuring smooth user interactions.
- Built with a clean architecture, RESTful APIs, and JWT-based authentication to maintain scalability, performance, and security.

SKILLS

- JavaScript
- Nodejs
- Express
- Nestjs
- PostgreSQL/prisma
- HTML5
- Css/TailwindCss
- ReactJs
